# SCREEN MODULE PM-EC

QUICK SET-UP GUIDE

1 connect your screen as shown on picture (colour scheme is the most commonly used within screen manufacturers)

2 Power the unit, then gently press the «prog» button with a rounded stick. Two LEDs were lit in red then only one remains lit up.

3 press the «up» and «down» transmitter buttons together TWICE, and watch the two LEDs blink three times.

4 Your screen module is ready to operate. You may record up to 21 transmitters in the memory by repeating 2 & 3 with each transmitter. In case of problem, erase the memory of the screen module by pressing and holding the «prog» button for approximately 10 sec. until the two red LEDs light up again.
